IT Cyber Security Policy

Objective: The objective of the PFC IT Cyber Security Policy is to secure the IT systems in following ways:

a. To maintain confidentiality, integrity, and availability of PFC's IT systems and data.
b. To ensure business continuity through systemic reduction of possible vulnerabilities in all spheres of PFC's cyber landscape.
c. To protect critical information and IT infrastructure from unauthorized access, usage, disclosure, modification, damage, disposal etc., covering entire landscape of IT infrastructure & applications.
